SUPPLY CHAIN MANAGEMENT

AVEEROS SCM

The Intelligent Supply Chain Engine

One Platform. Total Visibility.
Complete Control.

Aveeros
TECHNOLOGY FOR YOUR BUSINESS

SUPPLY CHAIN MANAGEMENT

Plug into Efficiency. Scale Without Limits.

AVEEROS SCM is a Cloud-based powerhouse designed to transform fragmented manual processes into a streamlined, high-visibility operation.

Built on a modern API-First architecture, it is a **universal fit** that integrates effortlessly with third-party applications or functions as a robust standalone solution.

SUPPLY CHAIN MANAGEMENT

The AVEEROS Journey

From Procurement to Delivery

Every great supply chain starts with a clear need. Whether triggered by an Order-based MRP or a manual request, AVEEROS ensures total control from the start.

The Request

Teams initiate purchase requisitions through defined approval workflows, ensuring every spend is authorized.

The Selection

Manage the complete quotation comparison lifecycle. Track supplier history and performance to ensure you are always partnering with the best.

The Commitment

Convert approved quotes into purchase orders and monitor their status in real-time until they arrive at your door.

SUPPLY CHAIN MANAGEMENT

The Gatekeeper

Inspection & Receiving

When goods arrive, the system takes over to ensure quality and cost accuracy.

Warehouse Receiving

Generate warehouse-specific GRNs to ensure real-time stock accuracy, faster posting to finance and audit-ready traceability.

Inspection & Control

Integrated quality checks act as a gatekeeper. Goods can be Held for inspection before becoming available for issuance, vital for pharma (DRAP) and food & beverage compliance.

True Landed Costing

Our import cost sheet management automatically factors in duties and freight, providing finance integrated, batch-wise stock costing for absolute financial precision.

SUPPLY CHAIN MANAGEMENT

Aveeros
TECHNOLOGY FOR YOUR BUSINESS

The Infinite Warehouse

Multi-Location Mastery

Unlimited Warehousing

Open and manage unlimited warehouses with real-time data synchronization across all locations.

Smart Stock Logic

Set up items with automated movement rules FIFO (First In, First Out), LIFO or FEFO (First Expired, First Out) for perishable or regulated goods.

Seamless Movement

Handle stock transfers and quantity adjustments through an approval-based hierarchy, keeping your inventory clean and auditable.

Manage one location or a global network with zero technical friction.

SUPPLY CHAIN MANAGEMENT

Intelligent Planning & Manual Flexibility

AVEEROS balances automated intelligence with manual control.

Material Planning

Use forecast-based MRP to predict future needs and prevent stockouts.

Manual Issuance

For ad-hoc projects or non-production needs, our manual issuance functionality allows for controlled, logged and visible stock exits.

Total Visibility

Access material status and reconciliation reports to see batch-wise inventory levels at a glance.
